

## Fort Dodge Middle School Auditorium

650 Seats.

Sound board in the back, off side of the lighting booth. Poor layout. Can't see the stage when seated at the board.

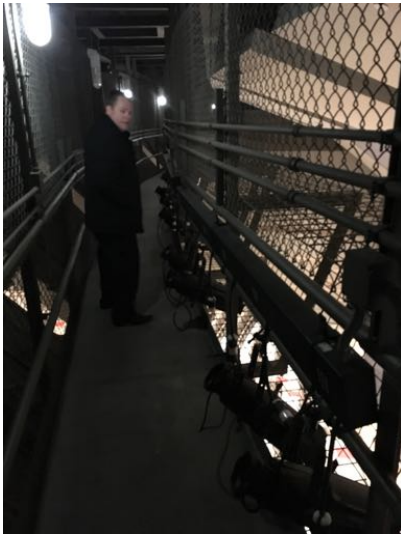

Light booth, PTZ camera controls, and streaming equipment.

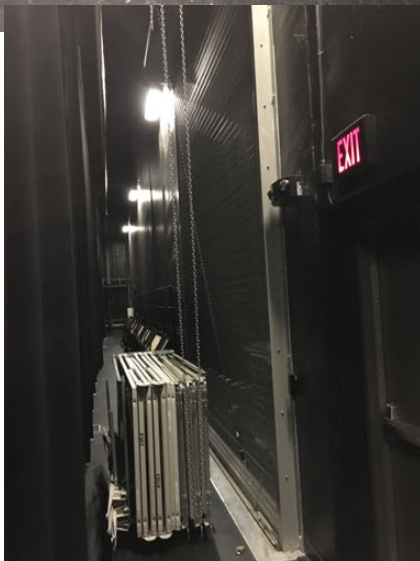

Mechanical room and audio equipment.

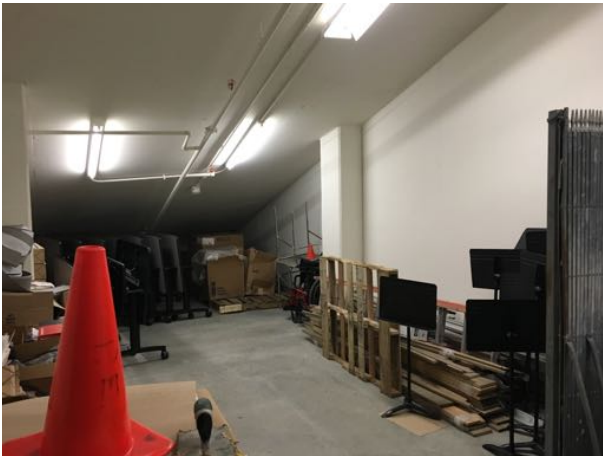

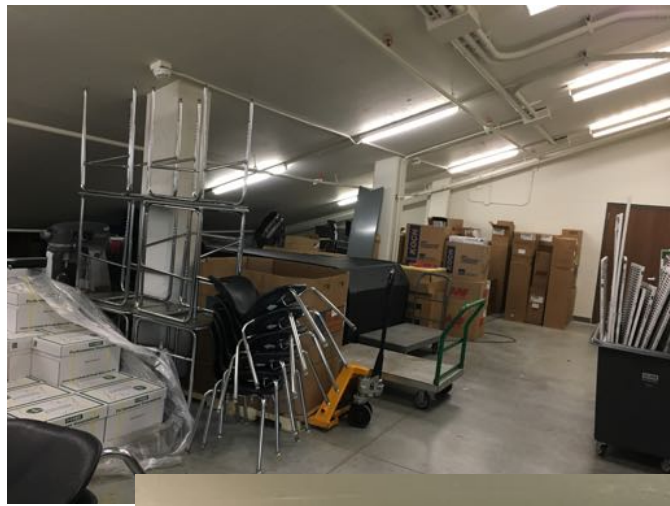

Catwalk.

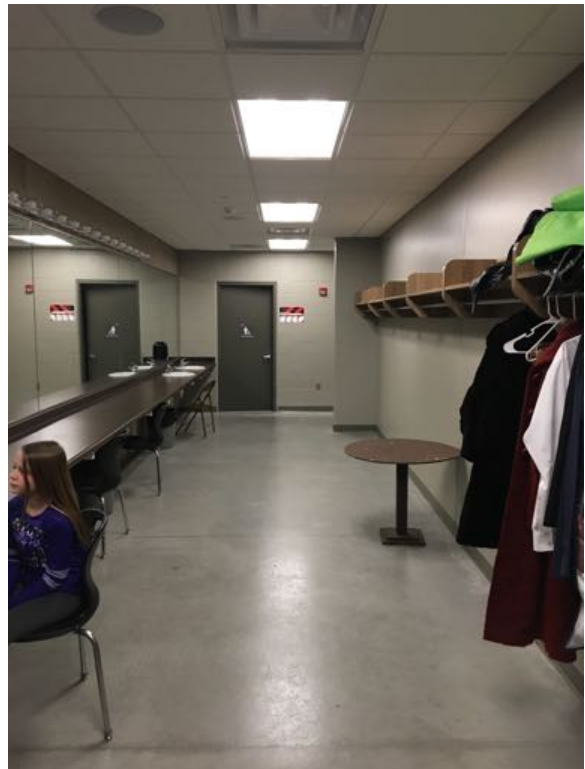

Painted stage all the way out to stage front. VERY small side wings. No room behind rear curtain.

Storage areas under rear tier of auditorium seats

Dressing room

Notes:

Not enough wing space

Too small back stage

Have to remove 30 seats to create orchestral pit

Video camera in the back to stream

Not digital sound - wish they were

have 8 channels of wireless audio... rent additional for their musical

I notice a bit of echo when talking in the auditorium

R & D Industries - Audio Engineering Group

5-6 million to build since it was with new construction... 8-10

had it been standalone

Glad they did it, suits most of their needs.

Regrets: storage, stage space, cutting corners on audio video
