

AUDITORIUM

- 600 seats to be located where the current music and art rooms are and to the south
 - Built as a SAFE room for students and staff during dangerous weather (tornado)
 - Remodeled high school commons would serve as foyer for the new auditorium
 - Centrally located for use by both elementary and secondary students during the school day (location of current music and art rooms)
 - Designed to promote all fine arts areas, e.g., instrumental music, vocal music, speech, art, and drama
 - Will also be available for community use
-

Career and Technical Education (CTE)

- Standalone steel building to be located just north of the current school (where the old portable classrooms are currently located)
 - Approximately 9000 square feet; current classroom and shop space is less than 4000 square feet
 - Classrooms for agriculture and industrial technology
 - Open shop area flexible in meeting the changing needs of vocational programming
 - Designed to promote career ready and meet the changing demands of our local and state economy, e.g., shortage area in skilled trades areas
-

HVAC IMPROVEMENTS

- Would include air conditioning and other HVAC improvements throughout the district facility
- May be part of this project or completed as a standalone project
